PAPER FROM COMMON GRASS .- The manufacture of paper from esparto grass has been carried on a long time; but the discovery was recently made in England that common grasses can be made into paper. No special process is called for—simply washing in water, treating in hot soda wash; another water bath; then grinding into a pulp. All the common kinds of grass, it has been found, answer equally well in the making of this new paper, only the grass must be cut before it has begun to run to seed. The fibre of the paper thus to seed. The fibre of the paper thus obtained has remarkable suppleness and strength, which renders the paper especially suitable for writing, drawing and tracing. It has been reckoned that two pounds of dried grass will give half a pound of paper-in other words, one-quarter of its weight. Two and a half acres of land will produce 5,000 pounds

Troublesome to the Army. During the civil war, as well as in our late war with Spain, diarrhoea was one of the most troublesome diseases the army had to coatend with. In many instances it became chronic and the old soldiers still suffer from it. Mr. David Taylor of Wind Ridge, Greene Co., Pa., is one of these. He uses Chamberlain's Colic, Colera and Diarrhoea Remedy and says he never found anything that would give him such a quick relief. It is for sale by all druggists.
